SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE

1. Immediately northwest of the small railway station of Krusheto (N 43-14, E 25-41), approximately 18 kilometers north of Turnovo, there is a large warehouse or fuel depot which comprises the following:
 - a. Two rows of sheds located next to a loading platform; each row consists of four connected sheds, for a total length of approximately 80 meters;
 - b. A large, cylindrical, vertical, semi-underground tank, in reinforced concrete, with an estimated capacity of approximately 50,000 liters; and
 - c. Four small metal tanks, also cylindrical and vertical, each with a capacity of approximately 10,000 liters;
2. The depot is served by a twin-track railway line. It is not enclosed and no military guard personnel was observed. For this reason it is believed that it is for the civilian needs of the country.
3. A sketch included as an appendix on page 2 shows the depot described above.
